

UNIVERSITY OF MARYLAND

Commencement

MAY 19-22, 2026

Hail! Alma Mater

Hail to thee, Maryland!

Steadfast in loyalty,

For thee, we stand,

Love for the Black & Gold

Deep in our hearts we hold,

Singing thy praise forever,

Throughout the land.

SPRING COMMENCEMENT / MAY 21, 2026

Dear Graduates,

Congratulations! Today's commencement and the conferral of your degree is a milestone that should bring you a tremendous sense of accomplishment. It also brings great pride to your family, friends and the University of Maryland.

This is a celebration worthy of incredible excitement and enthusiasm. During your time on campus, you have demonstrated perseverance, ingenuity and promise that we know will lead to great impact. From your classes and research to your clubs and internships, you have acquired the skills, developed the tools and earned the opportunity to make a difference.

The faculty, staff and administration of the University of Maryland are confident that you are now prepared to move *Fearlessly Forward* and continue on a path of excellence that will make the future better for everyone. Now is the time to go out and make your mark in the world by addressing the grand challenges of our time, from increasing literacy and civic engagement to furthering transformative technology and making our environment healthier and more sustainable.

Along the way, you should take heart in how your experiences here have shaped you and prepared you to overcome any obstacle. You are joining a vibrant community of Terp alums, more than 431,000 strong, connected by love for this university and dedication to using knowledge to better serve the public good.

My very best wishes to you, your family and friends. Let's keep moving *Fearlessly Forward* together.

Sincerely,

A handwritten signature in black ink that reads "Darryll J. Pines". The signature is written in a cursive, flowing style.

Darryll J. Pines
President, University of Maryland
Glenn L. Martin Professor of Aerospace Engineering

On behalf of the University of Maryland Alumni Association, congratulations on your graduation. Today marks an extraordinary milestone, and it is truly an honor to welcome you into our community of more than 431,000 Terp alums around the world.

You and your classmates have met challenges with determination, resilience and heart. Truly, you have risen to the moment. As you take this next step as a Maryland graduate, I want you to know this: Your Alumni Association will always be here for you. Our commitment to you does not end at Commencement—it grows with you.

As alums, we hope you will carry Maryland with you wherever life leads. Wear your Terp gear proudly and reflect on the excellence of the education you received here. In turn, this university will continue to elevate the power of your degree, push the boundaries of research and discovery, champion creativity and innovation, and inspire through scholarship, service and athletics. No matter where you go, you will always be a Terp—and you will always have a home at Maryland, with a special place for you at the Samuel Riggs IV Alumni Center. We hope you'll visit often.

Through your Alumni Association, you can stay connected to the friends you made at Maryland, the traditions that define us and a Terp community that will continue to support you—personally and professionally—for the rest of your life. As you move forward, carry with you the strength of your Maryland degree and the knowledge that you are part of something enduring. Wherever your journey takes you, remember that your Alumni Association is here to help you stay connected, stay inspired and always move forward.

Congratulations, Class of 2026. We are so proud of you.

Go Terps!

A handwritten signature in black ink, appearing to read "Bert Williams", written in a cursive style.

Honorary Degree Recipients

COURTNEY CLARK PASTRICK

Courtney Clark Pastrick served as president of the A. James & Alice B. Clark Foundation from 1987 to 2015, following her career as an attorney. During that time, she worked closely with her father, A. James Clark, a 1950 University of Maryland graduate who became a noted Washington-area builder and philanthropist, as well as the namesake of the university's engineering school. In 2015, after Clark's death, she led the Foundation through its planned 2025 sunset as board chair.

Under her leadership, the Foundation remained deeply committed to honoring her father's legacy by building sustainable partnerships, ensuring that they have the infrastructure and financial capacity to grow and support the communities they serve. The Foundation, along with the

Clark family and Clark Enterprises, have generously invested in UMD.

Pastrick has served in leadership and executive roles in many nonprofit sectors including education, college access, and health and community service, supporting organizations like Washington Jesuit Academy, Vanderbilt University and Sibley Memorial Hospital Foundation, among others in the Washington, D.C., and Easton, Md., communities.

Pastrick also served on the board of Clark Enterprises, a private investment firm and the holding company of the Clark Construction Group. She holds a bachelor's degree from Duke University and a J.D. from the Catholic University of America Columbus School of Law.

JOHNNY HOLLIDAY

Johnny Holliday has one of the most familiar faces and voices across Washington and Baltimore radio and television. He is best known for his 47-year run as the Voice of the Terps, calling more than 2,000 University of Maryland football and basketball games, including 16 bowl games, 12 Sweet Sixteens, two Final Fours and the men's basketball team's 2002 national championship victory.

Elsewhere, Holliday has handled play-by-play for George Washington basketball, Navy football, ACC women's basketball, the Baltimore Orioles, the Washington Nationals, the Washington Bullets and national gymnastics. He hosted Nationals pre- and postgame shows on MASN for 12 seasons and previously worked alongside Ted Williams on Washington Senators pregame radio. His work has earned national recognition; Dick Vitale named him a Top 15 play-by-play voice in the country.

His national broadcasting credits include ABC Radio sports reports heard coast to coast, coverage of the Winter and Summer Olympics, championship boxing, the USFL with Paul Hornung, the Masters, the Liberty Bowl and the Crosby celebrity golf tournament. Holliday also hosted Maryland football and basketball coaches' shows and served as a public address announcer for the Cleveland Browns, Oakland Raiders and San Francisco Warriors.

Before arriving in Washington in 1969, Holliday was a top-rated radio personality in Cleveland, New York City and San Francisco, where he was named America's No. 1 disc jockey. He was inducted into the Radio Television Broadcasters Hall of Fame in 2003, and the Rock and Roll Hall of Fame features his work.

Holliday has appeared on stage in numerous productions and earned a Helen Hayes Award nomination. He has also dedicated significant time to charitable efforts, raising millions of dollars through events supporting organizations such as Special Olympics and Children's Hospital.

In 2005, the All-American Football Foundation bestowed on him the Lindsay Nelson Outstanding Sportscaster award, and in 2006, he was honored by the National Football Foundation and the College Football Hall of Fame with the Chris Schenkel Award. His many other honors include *Washingtonian* magazine's Washingtonian of the Year, the Skeeter Francis Award and the National Academy of Television Arts and Sciences Gold Circle Award. Holliday has also authored two books, including "From Rock to Jock," an autobiography.

Holliday and his wife, Mary Clare, are the proud parents of Kellie, Tracie and Moira, and have 11 grandchildren.

University Medalist

NOORA GHAHREMANI

Noora Ghahremani '26 arrived at the University of Maryland determined to push beyond the conventions of writing, and in the years since, she has done exactly that: founding one literary magazine, editing another, and establishing herself as an award-winning poet.

The English literature and psychology dual-degree student did much more during her time on campus—from reenergizing the Spanish Club to completing three minors—saying she takes to heart Thoreau’s goal to “suck out all the marrow of life.”

“I have never had a student as brilliant and modest; as collegial with classmates; as perceptive a learner; and as hardworking as Noora,” said Professor of English Michael Olmert, calling her a “close observer of humankind.”

That sums up her recognition as university medalist, the highest honor bestowed on a graduating senior each academic year. It is based on academic distinction, exemplary character and service to the campus or broader community.

The native of Ellicott City, Md., applied her talents impactfully beyond the classroom. Last year as president of the UMD chapter of Sigma Tau Delta, an international English honor society, she founded, staffed and edited *Quillpower*, a literary arts magazine. She also was editor-in-chief of *Impressions*, the literary magazine for UMD’s Honors Humanities program.

Ghahremani pursued psychology to support her legal aspirations by studying human behavior—“to inform how I approach future clients, families and businesses, and also to understand myself,” she said.

As Spanish Club president, she helped increase membership from 30 to 300 by boosting recruitment, departmental partnerships and fundraising. As philanthropy chair for UMD’s Iranian Student Foundation, she helped secure thousands of dollars for charity.

Ghahremani received this year’s Phi Beta Kappa Senior Award, bestowed by UMD’s chapter of the prestigious honor society for her commitment to the liberal arts and sciences, freedom of inquiry and expression, intellectual integrity and the love of knowledge for its own sake. She was also one of two winners of the Seidel Keystone Prize for Achievement, the highest academic distinction in UMD’s Honors Humanities program, for her collection of poems grounded in literary and art historical scholarship.

She said her studies of divergent viewpoints and teachings in literary texts will serve her in law school, where Ghahremani will pursue a career in mediation and conflict resolution. Before that, she will spend a year completing an accelerated master’s program in the Robert H. Smith School of Business.

Student Speaker

JASON LAUCEL COULSON

As a teen, Jason Laucel Coulson '26 worked for his father's home construction business, hauling supplies, talking with clients, and painting and sanding fixtures. He seemed to follow a different blueprint at the University of Maryland, where as an information science major, he studied artificial intelligence (AI) and technology infrastructure, focusing on ethics and policy.

Yet Laucel Coulson will combine his interests as he launches his career this summer with the national construction firm, Whiting-Turner, where he will project-manage the erection of data centers in Northern Virginia.

"We have to have conversations about how these emerging technologies affect people of different income levels," he said, citing the water use, noise pollution and utility costs often associated with data centers sprouting up to power the AI boom.

In his new role, the Olney, Md., native intends to support efforts aligned with his values: community, dialogue and equal access for all. He models his work ethic after that of his father, who immigrated from El Salvador at 17 during that country's civil war and worked his way up through odd jobs to starting his own business.

At Montgomery College, where Laucel Coulson earned his associate's degree before transferring to the Universities at Shady Grove (USG), he tutored classmates. As a junior communications fellow with USG's

Macklin Learning Center, Laucel Coulson coached undergraduates in writing, public speaking and big data ethics. For the past two years as a member of UMD's College of Information Dean's Student Advisory Council (DSAC), he advocated for USG students, developed new programming and activities, and built bridges between the USG and UMD campuses.

"Jason is brilliant and capable of so many things but also very humble and approachable; he cares about his classmates in such a way that he wants them to be successful, too," said Tetyana Bezbabna, College of Information director of undergraduate programs and DSAC coordinator.

Intrigued by information science concepts like business intelligence, project management and team organization, Laucel Coulson transferred to USG, eyeing opportunities to serve society by promoting fairness.

"The way information flows—who can access it, who understands it, who feels included within it—depends on how thoughtfully it is built," he said.

The rapid rise of AI poses risks to social stability—military and surveillance overuse are two examples, he noted—but can democratize societies through proper regulation, Laucel Coulson said: "The best way to inform public policy is to speak out about it."

Commencement Speaker

JEANETTE EPPS

For nearly eight months in 2024, Jeanette Epps M.S. '94, Ph.D. '00 orbited the Earth every 90 minutes as a NASA astronaut and flight engineer on the International Space Station, where she contributed to groundbreaking scientific investigations. Epps splashed down in October with the rest of Crew-8, setting the record for the longest continuous space mission by an African American woman at 235 days.

Born and raised in Syracuse, New York, Epps graduated from Le Moyne College with a bachelor's degree in physics and earned her Maryland degrees in aerospace engineering. At UMD, she belonged to the university's Alfred Gessow Rotorcraft Center, testing designs and materials for helicopter rotor blades. After graduation, Epps worked as a researcher at the Ford Motor Company, where she was awarded two patents for work in vibration dampening and front collision location detection. She later

served seven years as a technical intelligence officer with the CIA, a tenure that included a tour in Iraq.

Epps joined NASA in 2009 as part of its 20th class of astronauts. She trained in spacewalking, robotics, geology, Russian language, and outdoor leadership and wilderness survival; her career also included a nine-day stint in an underwater habitat to develop asteroid mining techniques and mountaineering and spelunking training that culminated in a five-day exploration of a Slovenian cave system. Epps accumulated more than 830 hours in the T-38 aircraft, achieved flight qualification on the Russian Soyuz vehicle and cross-trained on the Boeing Starliner before her assignment to the Crew-8 mission. Following her return from space, she retired from NASA in 2025.

Doctoral Degrees

The doctoral degree is the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally doctor of audiology, doctor of medicine, juris doctor, doctor of pharmacy and doctor of veterinary medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees on March 9, 1841.

Master's Degrees

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

Bachelor's Degrees

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. Maryland Agricultural College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science degrees in 1862.

AUGUST 2025

COLLEGE OF AGRICULTURE AND NATURAL RESOURCES

Bachelor of Landscape Architecture

Wyatt Hunter Howell

Special Recognition

SENIOR MARSHALS

The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.

Heartfelt thanks go to the many staff who assist with the main and individual college and school ceremonies. These efforts are greatly appreciated.

DO GOOD NOW

The University of Maryland is proud to be the nation's first Do Good campus. As a global leader in advancing social innovation, philanthropy and nonprofit leadership, we remain fiercely committed to our mission of service.

We created the Do Good Institute to serve as the campus hub of social impact and innovation and launched the Do Good Challenge and Do Good Accelerator to scale up the impact of student projects and ventures. We invested in new research on civic engagement and expanded opportunities for students to learn about and practice giving back. And we are just getting started.

As graduates of the university, you are now agents of change and progress. Your experience here has equipped you to do good in your professional and personal lives. You are ready to help build a Do Good world.

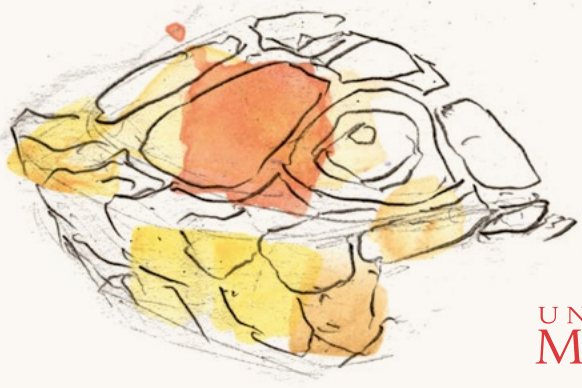

For more information, visit dogood.umd.edu.

Congrats, Terp Grads!
